

HYDROTRIM™

Water-activated, self-adhesive drywall corner trim.

HYDROTRIM™ 1/2" L TRIM

CONSTRUCTION

- High strength tapered co-polymer core
- Surface: Tight fibered, formulated paperboard
- Back: 90 pound Kraft adhesive coated paper
- Solid paper/plastic/paper laminated construction across entire width of the product
- Pliable flange lays down flat, offering superior bonding and easier finishing
- Perforated flange allows joint compound to make spot contact with drywall, creating a secondary solid bond
- Adhesive gives optimal working time and adjustability while forming an aggressive, quick bond under variable situations

DURABILITY

- Uniform structural bonding with corner prevents cracks and callbacks
- Will not blister or bubble
- Will not separate from wall
- Will withstand significant shifting due to settling, lumber drying, temperature and humidity variations

AESTHETIC QUALITIES

- Crisp, sharp lines
- Perfect surface for paint and textures
- Will withstand sanding without surface degradation
- Smoother finish

PACKAGING

- Available in 10' lengths
- 50 pieces per carton

DIMENSIONS

- Co-polymer laminate center thickness approximately .056"
- Co-polymer edge thickness approximately .021"
- Total Flange width 1.697"
